SUN ORIENTATION

Continuous exposure to the sun has more harmful effects (e.x. south-facing areas)

Impact on maintenance time:
HIGH

+

ARCHITECTURE

Some architectures don't help to give the siding a break (e.x. no roof overhangs)

Impact on maintenance time:
MEDIUM

+

LOCATION

A stripped environment around the property exposes it more to the elements (e.g., the top of a hill or waterfront versus in a forest).

Impact on maintenance time:
MEDIUM

+

COLOR

Some colors are weakly pigmented or very dark, making them prone to degradation(e.x. very light semi-transparent or black opaque)

Impact on maintenance time:
LOW
